• Special categories of cited documents :	"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
"A" document defining the general state of the art which is not considered to be of particular relevance	"X" document of particular relevance: the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
"E" earlier application or patent but published on or after the international filing date	"Y" document of particular relevance: the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)	"&" document member of the same patent family
"O" document referring to an oral disclosure, use, exhibition or other means	
"P" document published prior to the international filing date but later than the priority date claimed

## INTERNATIONAL SEARCH REPORT

International application No.  
PCT/CA2005/000423

### Continuation of Box II:

Claims 1-37 relate to an extremely large number of possible compounds, compositions and uses thereof. Support within the meaning of Article 6 PCT and/or disclosure within the meaning of Article 5 PCT is to be found however for only a very small proportion of the defined compounds, compositions and uses thereof. In the present application, the claims so lack support and the specification so lacks disclosure that a meaningful search over the whole of the claimed scope is not possible. Consequently, the search has been carried out for those parts of the claims which appear to be supported and disclosed, namely those parts that relate to the compounds defined in claim 20.

It is stressed that the initial phase of the search revealed a very large number of documents that call into question the novelty and inventive step involved in claims 1-20. Only the most relevant of these documents have been cited in the search report. As a result, a meaningful search over the whole of the defined scope of claims 1-37 is not possible and the search has been limited as described above.

# INTERNATIONAL SEARCH REPORT

International application No.  
PCT/CA2005/000423

## Box No. II Observations where certain claims were found unsearchable (Continuation of item 2 of the first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons :

1. ☒ Claim Nos. : 30 - 37  
because they relate to subject matter not required to be searched by this Authority, namely :  
  
Although claims 30 to 37 are directed to methods of medical treatment of the human/animal body, the search has been carried out based on the alleged effects of the compounds of claims 1 to 20 on modulating cell proliferation.
2. ☒ Claim Nos. : 1-37  
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically :  
  
see additional sheet
3. ☐ Claim Nos. :  
because they are dependant claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

## Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows :

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying additional fees, this Authority did not invite payment of additional fees.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claim Nos. :
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claim Nos. :

- Remark on Protest** ☐ The additional search fees were accompanied by the applicant's protest and, where applicable, the payment of a protest fee.
- ☐ The additional search fees were accompanied by the applicant's protest but the applicable protest fee was not paid within the time limit specified in the invitation.
- ☐ No protest accompanied the payment of additional search fees.
